

Caratank 8kg up to 46kg

Autogas 2000 Leisure Ltd "Caratank"

Caratank is a unique bulk underfloor LPG tank suited ideally to motorhome users and catering trailers alike.

The Caratank is available in various sizes and once mounted underfloor will free extra space that is normally taken up by gas bottles in the locker box.

Each Caratank is designed to be filled from a filler point conveniently mounted on the external side of the vehicle and with use of filler adapters can be filled while travelling through Europe without the need to swap bottles over.

The filling of the Caratank is controlled automatically by a float activated over fill protection valve ensuring no more than 80% fill can be achieved.

The Caratank also has a unique float activated gauge giving a reading in percent of the tank capacity, thus allowing the user to determine the amount of LPG remaining in the tank. This gauge can also be upgraded to a remote LED display to read on the dashboard, as an optional extra if required.

Water Capacity	Useable LPG in KG
20 ltr 200x717mm	8 kg
23 ltr 230x630mm	9.2 kg
25 ltr 200x884mm	10 kg
30 ltr 270x607mm	12 kg
30 ltr 200x1052mm	12 kg
38 ltr 230x1014mm	15 kg
40 ltr 270x792mm	16 kg
55 ltr 360x645mm	22 kg
55 ltr 270x1069mm	22 kg
60 ltr 315x869mm	24 kg
70 ltr 315x1004mm	28 kg
85 ltr 360x944mm	34 kg
100 ltr 360x1099mm	40 kg
116 ltr 360x1275mm	46 kg

All underfloor tanks are to R6701 standard and come with certificate and all safety valves.

Internal LED gauge

25ltr Fiat Panel Van

We also stock gas regulators from 30mb up to 50mb.

Direct to tank crash sensing gas regulators available.

Optional electric gas solenoid available for leisure use with very low 40ma draw.

Continental filling adapters.
